

Codell Combines TBA, ETAL

The Barry Code is always ready to be unlocked with the right combination. Two higher hybrids now to be announced are:

Total Bases + Tallied Bases (TBA) and Essential Bases + Tallied Bases (ETAL)

Total Bases and Tallied Bases seem an especially perfect fit, as high total base totals have always been justifiably reputed to bequeath run production. Exceeding 1,000 TBA would make for one legendary season!

Essential Bases (RB + TB) add the reached base factor to the equation. Indeed, we recall the ratios Reached Bases/R and Total Bases/RBI are similarly related, according to Codell, as we translate Runs and RBI's to Tallied Bases (TaBa). A 1,300 ETAL season seems as striking as a 1,000 TBA campaign. Listed below are the top 15 batting years over 1,000 TBA and 1,300 ETAL, including per-game bases for TBA, ETAL, et al:

| Rank | Player | Year | TB | TaBa | EB | TBA | ETAL | Games | TBA/G | ETAL/G | CC/G* |
